Barry participates in Modelithics System Component Library

October 2007 - Attleboro, MA 02703 - Barry Industries announces their partnership with the Modelithics System Component Library (SCL). The Modelithics (SCL) is the industry's first and only library of its kind containing accurate models for devices such as amplifiers, mixers, filters, attenuators, switches, and couplers. Featured SCL elements for Barry products are substrate-and part value – scalable models for surface mount attenuators.

Established in 1977, Barry provides a full line of Power and Precision Thick Film resistors, terminations and attenuators on Alumina, BeO, BeO FreeTM and Aluminum Nitride for your microwave and RF applications.

Barry also has an LTCC multilayer foundry, design and production facility for products to 65 GHz. High Power Ceramic Packages, Machining and Electroplating – a vertically integrated company.
