

Job Title: Engineering Training Internship

MODELITHICS, INC., the leading independent provider of simulation models for Radio Frequency and Microwave (RF/MW) devices, has openings for one or more RF Electronics Engineering Internships. The Engineering Intern will be trained on various skills related to the fixturing, measurement and computer simulation of radio frequency and microwave devices. Minimum requirements include enrollment in or completion of a BSEE or MSEE degree program. Academic or practical exposure to RF/Microwave measurements and modeling techniques for high frequency devices is highly desirable along with good verbal and written communication skills and computer proficiency. Hiring preference will be given to candidates with US Citizenship or Permanent residency.
