Tampa, Florida —May 17, 2011

Modelithics, Inc. (www.modelithics.com), a premier provider of high-precision measurements and models for microwave/RF design simulation would like to thank its customers and partners as it celebrates its ten year anniversary.

Entrepreneurs Tom Weller and Larry Dunleavy founded Modelithics in 2001 to better address the industry-wide need for improved simulation models for RF & Microwave circuit design. What started as an incubator company on the University of South Florida campus now provides characterization services and models across the globe. Their premier product – The Modelithics COMPLETE Library is a software compilation of linear and non-linear models for electronic

design automation software like the Agilent Advanced Design System and Genesys suites and AWR's Microwave Office. The Modelithics COMPLETE Library now represents more than 6500 active and passive devices. Modelithics' track record has earned them recognition throughout the industry as experts on precision measurements and models that design engineers trust. *"During the past ten years we have remained focused on providing the most technologically advanced services and high quality, well-documented models along with unparalleled support to our customers,"* said Larry Dunleavy, President and Founder of Modelithics. *"I believe our team of dedicated experts who focus on outstanding customer service is the key to our success. We expect the next ten years to be even more successful. However, to better serve our customers we have contracted a third party market research firm to perform an industry-wide survey about modeling needs and how Modelithics may be an even more helpful resource to the design community. "*

For more information or to request a free trial of the Modelithics Libraries, contact Modelithics at Sales@Modelithics.com , or click on the free trial link you'll find at: <http://www.modelithics.com>. To just provide feedback or participate in our modeling-needs survey, please send an email to info@modelithics.com .

About Modelithics, Inc.

Modelithics, Inc. (www.Modelithics.com) was formed in 2001 to address the industry-wide need for high-accuracy RF and microwave active and passive simulation models for use in Electronic Design Automation (EDA). Current products include the *CLR Library*[™], which contains measurement-based *Global Models* for a multitude of commercially-available passive component families, the *NLD Library*[™] (non-linear diode models), the *NLT Library*[™] (non-linear transistor models) and the *SLC Library*[™] (system level component models). Modelithics' services also address a wide range of custom RF and microwave measurement and modeling needs.

Modelithics[®] is a registered trademark of Modelithics, Inc. *CLR Library*[™], *NLD Library*[™], *SLC Library*[™] and *NLT Library*[™] are also trademarks of Modelithics, Inc.
