Celebrating 20 Years

A Note of Thanks from the Founders of Modelithics

As the co-founders of Modelithics, Inc., we are honored to announce that we have crossed another milestone in the history of our company. As of March 1, 2021, Modelithics will be celebrating 20 years of establishment. We take this occasion to thank all the people and companies that have been an important part of Modelithics story.

What began as a small spinout startup from the University of South Florida has risen to stand tall as the industry leader in RF, microwave and millimeter-wave measurements and measurement-based modeling of RF and microwave components and semiconductor devices. We are proud of our company’s many innovative products, custom service projects, designer focused application notes and other accomplishments that have proven to be exceptionally productive for our customers.

We are grateful to all of our customers and partners and our current and alumni team members who trusted in us to help them achieve their design goals, improve their own customer support and in the case of our team members, grow their careers in a dynamic and challenging environment. To our many current and past team members, every one of you has played a very important role in the development of Modelithics. Our customer’s requests and demands push us to continuously improve our capabilities and model features. They have made us a part of their lives and helped us reach out to the world with their endorsements. It is your enthusiasm, support and loyalty that have brought us through the last 20 years with such a well-established reputation for quality.

We plan to keep our business and relation growing with you and continue to provide you nothing less than the best. With your support, we wish to explore new heights this year and in the many years ahead.

Sincere Thanks,

Dr. Lawrence Dunleavy & Dr. Thomas Weller
