FOR IMMEDIATE RELEASE

April 04, 2013

Free Mini-circuits Attenuator Models!

Mini-Circuits and Modelithics Partner to provide RF & MW Attenuator Models

Brooklyn, New York and Tampa, Florida , Mini-Circuits and Modelithics, Inc. have agreed to collaborate in the development of high-accuracy EDA simulation models of Mini-Circuits' surface-mount microwave precision fixed attenuators YAT and RCAT, series. The high-frequency substrate-scalable models are currently in development and will be available later this quarter for **FREE** download from the Modelithics website: <http://www.modelithics.com/mvp/Mini-Circuits/>. The models will also be included in the Modelithics free SELECT PLUS version of its Library of advanced RF and MW simulation models.

Harvey Kaylie, Founder and President, Mini-Circuits commented as follows:

"I have watched Modelithics grow from inception to become a trusted source of high quality models and data for design use. We are pleased to launch this collaboration for the benefit of our customers."

Precision Measurements and Models You Trust

Modelithics, Inc. (www.Modelithics.com) was formed in 2001 to address the industry-wide need for high-accuracy RF and microwave active and passive simulation models for use in Electronic Design Automation (EDA). Current products include the *CLR Library™*, which contains measurement-based *Global Models™* for a multitude of commercially-available passive component families, the *NLD Library™* (non-linear diode models) the *NLT Library™* (non-linear transistor models), and the *SLC Library™* (*system level component models*). Modelithics' services also address a wide range of custom RF and microwave measurement and modeling needs.

Modelithics® is a registered trademark of Modelithics, Inc. CLR Library™, NLD Library™, NLT Library™, and the SLC Library™ are also trademarks of Modelithics, Inc.

About Mini-Circuits.

Mini-Circuits was Founded in 1969 with a mission to manufacture quality products at a competitive price. Mini-Circuits is now a global leader in the design, manufacture, and distribution of RF, IF, and microwave components and integrated modules covering the DC to 40 GHz band, for commercial, industrial, space, and military applications. With 27 different product lines representing thousands of off-the-shelf and custom models, Mini-Circuits offers the world's largest variety of over 10,000 signal processing products.
