Modelithics CLR Library for ANSYS HFSS

In step with latest design trends, Modelithics, Inc. is excited to announce significant enhancements and capabilities to the Modelithics libraries. Our high-accuracy, scalable, high-frequency simulation models for Keysight ADS and NI/AWR Design Environment (MWO) feature model settings for convenient and accurate electromagnetic co-simulation. In addition to the annual major releases of the Modelithics Library for ADS, MWO and Keysight Genesys, Modelithics will soon add a library that supports ANSYS Electronics Desktop (HFSS). Designers using HFSS will now have the opportunity to use exceptional Modelithics models for seamless EM co-simulation and maximum design accuracy.
