

Announcing the latest release of the Modelithics® Qorvo GaN Library!

The Modelithics Qorvo GaN Library v1.6.8 is now available by request for designers or as an upgrade to existing Qorvo GaN library installations.

This release features two new packaged GaN RF Power transistor models:

- TQP0104 (30W)
- QPD2796 (200W)

The transistor simulation models offer the most advanced features for maximum design flexibility and accuracy, including temperature scaling, adjustable self-heating factor control, and intrinsic current and voltage sensing capability. Each model has a detailed datasheet summarizing model features, development details, and model performance plots.

Existing library users can find the updated library in the “My Downloads” section after logging on to the [Modelithics website](#).

Designers wishing to request the models for the first time can do so [here](#). If you have any questions, please contact us at [support@modelithics.com](mailto:support@modelithics.com).

Thank you!  
*The Modelithics Team*
