Modelithics Celebrates 15-Year Anniversary Milestone

Fifteen Years of Exceptionally Accurate High Frequency Measurements and Models

Tampa, Florida (April 4, 2016) – Modelithics, Inc., the industry leader in simulation models for RF, microwave, and millimeter-wave devices, is very excited to announce and celebrate fifteen successful years in business! Since 2001, Modelithics has delivered excellence and innovation in the field of RF and microwave wireless design.

“We would like to thank our colleagues, customers, partners and employees for the continuous success and growth of Modelithics over the years”, said Larry Dunleavy, President and CEO. *“Our 15 year milestone represents our commitment to delivering outstanding value to our customers as we continue to pursue our vision: To be the indispensable source for the World's Best RF & Microwave Simulation Models.”*

Modelithics' premier product, the Modelithics COMPLETE Library has grown from its initial release, containing less than 2000 components, to the latest version which now represents over 10,000 commercially available RF and microwave passive and active devices. The library contains Modelithics' unique and advanced scalable Microwave Global Models™ for passive RLC devices, along with the industry's most advanced non-linear precision active device equivalent circuit models for transistors and diodes, and feature-rich models for system-level components such as filters, amplifiers, mixers, attenuators and more.

Through our Modelithics Vendor Partner (MVP) Program, we have built strong relationships with the most popular electronic component, equipment and software vendors, to collaborate in providing these powerful design resources to our customers in the RF & microwave design community, with a mutual goal of helping designers achieve one-pass design success!

Modelithics is continuously expanding our product and adding new simulator support. We look forward to this ongoing advancement, increasing the positive impact Modelithics has had on the industry.

For more information about Modelithics and our vision for the future, contact us through our website: www.modelithics.com/Home/Contact or email sales@modelithics.com.

World's Best RF & Microwave Simulation Models

About Modelithics, Inc.

Modelithics, Inc. (www.Modelithics.com) was formed in 2001 to address the industry-wide need for high-accuracy RF and microwave active and passive simulation models for use in Electronic Design Automation (EDA). Modelithics' premium product is the *Modelithics*® *COMPLETE Library*, which includes the *CLR Library*™, containing measurement-based *Microwave Global Models*™ for a multitude of commercially-available passive component families, the *NLD Library*™ (non-linear diode models) the *NLT Library*™ (non-linear transistor models), and the *SLC Library*™ (system level component models). Modelithics' services also address a wide range of custom RF and microwave measurement and modeling needs. Modelithics® is a registered trademark of Modelithics, Inc. *Microwave Global Models*™, *CLR Library*™, *NLD Library*™, *NLT Library*™, and the *SLC Library*™ are also trademarks of Modelithics, Inc. The Modelithics Vendor Partner Program allows for collaboration and open communication during the development of advanced data sets and models for commercially available microwave components and devices, with flexible sponsorship and distribution arrangements for the resulting data and models.
