Small Parts Simulation Models

The Modelithics SMALL PARTS Library of measurement-based, equivalent circuit models for RF/MW simulation now includes more Global™ models than ever for **0402, 0201 and 01005 (EIA)** size passive components from KEMET, AVX, and other popular suppliers. Each Global model typically represents an entire component family, is accurate from DC to **20GHz** or higher, and scales with substrate thickness, pad-geometry, and part-value. The Modelithics SMALL PARTS Library now contains 84 Global Models, and more are added with each library release. See available parts at www.Modelithics.com.

About Modelithics, Inc.

Modelithics, Inc. (www.Modelithics.com) was formed in 2001 to address the industry-wide need for high-accuracy RF and microwave active and passive simulation models for use in Electronic Design Automation (EDA). Current products include the CLR Library™, which contains measurement-based Global Models for a multitude of commercially-available passive component families, the NLD Library™ (non-linear diode models) the NLT Library™ (non-linear transistor models), and the SLC Library™ (system level component models). Modelithics' services also address a wide range of custom RF and microwave measurement and modeling needs.

Modelithics® is a registered trademark of Modelithics, Inc. CLR Library™, NLD Library™, NLT Library™, and SLC Library™ are also trademarks of Modelithics, Inc.
