

NEW CLR Library for
SONNET[®]
 Suites[™]

Modelithics, Inc. is once again expanding the availability of the powerful Modelithics CLR Library of Microwave Global Models[™] for capacitors, inductors, and resistors. The Modelithics[®] CLR Library for Sonnet[®] Suites[™] is now available to designers using Sonnet software.

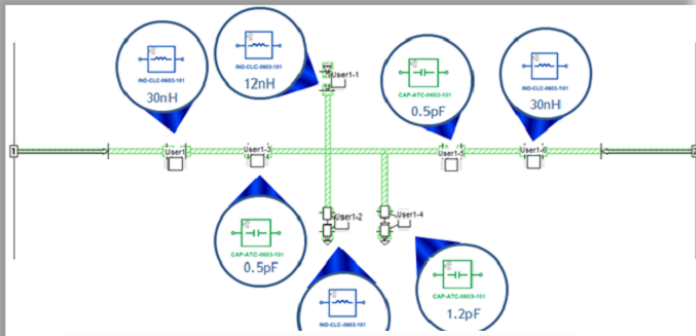

The advanced simulation models offer scalability of substrate properties, part value and pad dimensions, and accurately predict parasitic effects based on these inputs, giving RF and MW designers excellent measured-to-simulated agreement and design flexibility. This will bring a new level of accuracy to electronic and electromagnetic co-simulation analyses within Sonnet software.

Modelithics Models in Sonnet Suites

- Models
- Modelithics
 - Parts by Type
 - Parts by Vendor
 - Aeroflex/Inmet
 - ATC
 - AVX
 - Barry
 - Chilisin
 - CoilCraft
 - DLI
 - Epcos
 - JDI
 - Johanson
 - Kemet
 - KOA
 - Murata
 - Panasonic
 - Passive Plus
 - Presidio
 - Syfer

— Simulation with standard s-parameter files
 — Simulation with Modelithics models
 ΔΔΔ Measured Data
