FOR IMMEDIATE RELEASE

October 15, 2024

Modelithics is Pleased to Introduce Exocis as a Modelithics Reseller for France

Tampa, Florida (October 15, 2024) – Modelithics®, the industry leader in providing innovative and high-quality custom modeling and measurement services for RF, microwave and millimeter-wave electronic devices, is pleased to introduce Exocis, based in Limoges, France and closely linked with AMCAD SAS, as a Modelithics Reseller.

Exocis provides a comprehensive range of high-performance solutions in electronics, RF, and microwave technologies. In addition to distributing qualified components and systems, we offer turnkey measurement solutions dedicated to the characterization, modeling, and design of components, circuits, and subsystems.

Through strategic collaborations, Exocis is enhancing their offering with state-of-the-art simulation tools for many of today's leading EDA software tools. This expertise enables Exocis to tackle the most complex technical challenges, while optimizing the performance of their clients' RF devices.

As a reseller of Modelithics, Exocis will be able to meet the needs of design engineers within the France by offering high-accuracy RF and microwave active and passive simulation models for Modelithics' premium product the Modelithics COMPLETE Library, which represents more than 28,000 components from over 75 component and IC vendors. Also available is the mmWave & 5G Library, System Components Library™ and the COMPLETE+3D Library. The COMPLETE+3D Library includes Modelithics extension collection of CLR component models, plus over 600 3D Geometry models.

In addition, Exocis will be representing Modelithics' broad array of highest quality, RF/microwave/mm-wave Characterization and Modeling services, including Modelithics' world-class GaN modeling and 3D modeling capabilities.

"We have been friends with AMCAD for years and as they are well known and based in France, we are confident they can advise design engineers there about how and when to use Modelithics Library models to improve simulation-base design success." said Larry Dunleavy, President and CEO of Modelithics.

The Modelithics library portfolio is available now from Exocis. Please contact your account manager or visit Exocis at http://exocis.com/ for more information.

Over 23 Years of Precision Measurements and Modeling Excellence!

About Modelithics, Inc.

Modelithics, Inc. (www.Modelithics.com) was formed in 2001 to address the industry-wide need for high-accuracy RF and microwave active and passive simulation models for use in Electronic Design Automation (EDA). Modelithics' premium product is the Modelithics® COMPLETE Library, which includes the CLR Library™, containing measurement-based Microwave Global Models™ for a multitude of commercially available passive component families, as well as non-linear diode models, non-linear transistor models, and system-level component models. Modelithics' services also address a wide range of custom RF and microwave measurement and modeling needs. Modelithics product offerings, which support multiple EDA software platforms, also include the Modelithics mmWave & 5G Library, Modelithics System Components Library™ the Modelithics COMPLETE+3D Library. Modelithics® is a registered trademark of Modelithics, Inc. Microwave Global Models™, System Components Library™, and CLR Library™ are also trademarks of Modelithics, Inc. The Modelithics Vendor Partner (MVP) Program allows for collaboration and open communication during the development of advanced data sets and models for commercially available microwave components and devices, with flexible sponsorship and distribution arrangements for the resulting data and models. An example of such an arrangement is the Modelithics Qorvo GaN Library, a fully sponsored library distributed for free by Modelithics under the sponsorship of Qorvo®. Modelithics also offers a Standard and Custom Test Fixture and Accessory Product Line, including legacy parts from J Micro Technology for a family of thin film Alumina substrate components.

About Exocis

Exocis, based in Limoges and closely linked with AMCAD SAS, provides a comprehensive range of high-performance solutions in electronics, RF, and microwave technologies. In addition to distributing qualified components and systems, we offer turnkey measurement solutions dedicated to the characterization, modeling, and design of components, circuits, and subsystems. Through strategic collaborations with industry leaders like Modelithics, renowned for their measurement-based RF and microwave component model libraries, we enhance our offering with state-of-the-art simulation tools. This expertise enables us to tackle the most complex technical challenges, while optimizing the performance of our clients' RF devices.
