EMIFIL® (Inductor type) Chip Ferrite Bead for GHz Noise

BLM15E Series (0402 Size)

■ Dimensions

■ Equivalent Circuit

(Resistance element becomes dominant at high frequencies.)

■ Derating of Rated Current

In operating temperature exceeding +85°C, derating of current is necessary for BLM15E series. Please apply the derating curve shown in chart according to the operating temperature.

Derating of Rated Current

This data sheet is applied for CHIP FERRITE BEAD used for General Electronics equipment for your design.

Note:
1. This datasheet is downloaded from the website of Murata Manufacturing co., ltd. Therefore, its specifications are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering.
2. This datasheet has only typical specifications because there is no space for detailed specifications. Therefore, please approve our product specifications or transact the approval sheet for product specifications before ordering.
Continued from the preceding page.

**Caution/Notice**

**Caution (Rating)**
Do not use products beyond the rated current as this may create excessive heat and deteriorate the insulation resistance.

**Notice**
Solderability of Tin plating termination chip might be deteriorated when low temperature soldering profile where peak solder temperature is below the Tin melting point is used. Please confirm the solderability of Tin plating termination chip before use.
