Applications Engineer - Posting:

Job Description

MODELITHICS, INC., the leading independent provider of simulation models for Radio Frequency and Microwave (RF/MW) devices, seeks an Applications Engineer. Position requirements include a bachelor's degree in electrical engineering with RF and microwave focus, or BSEE with minimum 2 years' experience in RF Engineering related technical position, or master's degree in electrical engineering with RF and microwave focus, plus excellent communication skills, along with a sincere interest and aptitude for marketing / sales related application related work.

Primary job responsibilities include technical support and promotion of Modelithics products and services. The Applications Engineer communicates directly with external customers, partners, and sales representatives and coordinates closely with Modelithics, engineering, sales and management teams to identify and develop new opportunities. The qualified applicant may participate in customer visits, trade shows, webinars, marketing and training videos and web meetings to provide training and troubleshooting as well as to gather information for service product quotation requests (RFQ's). The Applications Engineer works with the Sales & Marketing Manager and Engineering team to develop application notes, design examples, papers and video tutorials. Additional responsibilities may include working directly with the software product team to manage multiple software product installer and early access testing phases.

This position requires possession of or ability to acquire:

- Excellent communication and organizational skills
- Strong understanding of Modelithics products and services and the ability to provide software demonstrations, answer technical questions, help with troubleshooting, etc.
- Proficiency with multiple supported simulators (Keysight ADS, NI AWRDE, Keysight Genesys, ANSYS HFSS, Sonnet Suites and Cadence)
- High proficiency with Microsoft Office programs, including Word, Excel, Power Point, and Outlook
- Experience with RF and Microwave Circuit Design simulation tools.
- Experience with Camtasia audio/video recording and editing software

Modelithics is located in beautiful Tampa Bay, FL and anticipates a competitive salary range that is negotiable, depending on experience and degree level, with benefits that include vacation, health, life, disability, and retirement plans.

Note: U.S. Citizenship or permanent residency is a requirement for this position.
