Modelithics University Consideration Request for Use of Modelithics MACOM GaN Library

MACOM extends special consideration in terms of providing use of the Modelithics developed and distributed Modelithics MACOM GaN Library to qualified faculty-supervised students for use in projects that may lead to a published paper thesis, dissertation or application note that will illustrate use of models and MACOM GaN devices for improved designs.

1. **Faculty and Student Contact Information**: Have an appropriate faculty advisor contact us via email (support@modelithics.com) to confirm their involvement with your project and this request. He or she will be the official long-term point of contact for Modelithics. Please fill in the information below to provide us with complete contact information for the faculty supervisor and student designer. You or an alternate student or staff person can serve as the short-term coordinator with us.

Contact information

	Faculty Supervisor	Student Designer
Institution		
Contact Name		
Institution Address		
Phone Number		
Email Address		

2. **Summary:** Provide a summary below of how you will use the requested models as part of your classroom, design, or research project. In order to provide the best support, it will help if you can understand which passive and active components from our model library you will most likely use and/or which models you ideally would like to see added to better support your design effort. **Provide details in below box.** *(use attachments or additional space as needed)*

3. **Credit in papers:** In any paper resulting from this effort, indicate that Modelithics MACOM GaN Library models were used in the work and/or otherwise give credit to Modelithics in diagrams and simulation outputs where appropriate and reference the MACOM product used in the project. In reference or acknowledgement sections of papers and reports, please reference "Simulation models utilized under the University License Program from Modelithics, Inc., Tampa, FL and MACOM, Lowell, MA"

4. **Paper Notification/Copies:** Please send Modelithics an electronic copy of any papers or reports related to the design and/or notify Modelithics of where and when the paper will be

Note: Modelithics will share this information with appropriate partner contacts at MACOM.

published. (Note: Modelithics will share this information with appropriate partner contacts at MACOM.)

5. **Support and Additional Interaction**: As a user of Modelithics models under our university program, you have access to Modelithics Support, which includes email support in case of any assistance with using the Modelithics models.

6. **Additional Interaction:** Modelithics and MACOM are interested in your having a successful design experience using our models and MACOM products. Please notify us at support@modelithics.com if your results do not provide a satisfactory level of simulation to measured agreement and we will try to help you understand the reason. We are interested in helping you "close the loop" between your measured and simulated results.

Modelithics will send a cloud license file and software plus links to training material. We will request an update as to the progress on your design as a condition of license extensions.

Requested Simulator(s): _____ Keysight ADS
_____ Cadence AWR Design Environment

Number of Requested Seats: _____

Modelithics will send a cloud license file and software plus links to training material. Additional license file formats available upon request. We will request an update as to the progress of your design as a condition of license extensions.

Agreement: It is our intention to comply with the above conditions related to the loan or discounted purchase of the Modelithics Library software for the purpose outlined herein.

By signing this form, we agree that our access to and use of the MACOM GaN library will be solely for non-commercial, academic purposes.
